Build after other projects are build:

This means: Your job will automatically run **after another job finishes**.

Example

- You have **Job A** and **Job B**.
- You want **Job B** to start after **Job A** finishes

Build Periodically: In **Jenkins**, the option "**Build periodically**" is used to schedule a job to run automatically at specific times (like a cron job in Linux).

CRON Syntax:

- **MINUTE** → (0 - 59)
- **HOURL** → (0 - 23)
- **DOM** → Day of Month (1 - 31)
- **MONTH** → (1 - 12)
- **DOW** → Day of Week (0 - 7) → Sunday = 0 or 7

Poll SCM:

- Jenkins checks your **Source Code Management (SCM)** system (like Git, SVN) at regular intervals.
- If there are **no changes**, the build does **not run**.
