```

1 :- Commands used **'ln -s swapnil softlink.txt'** **'ln Swapnil hardlink.txt'**

****For Softlink****

Step 1:- Create a folder and create a file.txt inside that folder

Step 2:- Write some lines inside that file.txt use command **'vi file.txt'** now press **Esc :wq!** to save what you write

Step 3:- Now use above line **'ln -s Swapnil softlink.txt'** now press **'cat softlink.txt'** check same data reflect in that file or not.

Step 4:- Now if you delete the original file.txt the softlink.txt file will also not work.

****For Hardlink****

Step 1:- Create a folder and create a new.txt inside that folder

Step 2:- Write some lines inside that new.txt use command **'vi new.txt'** now press **Esc :wq!** to save what you write

Step 3:- Now use above line **'ln Swapnil hardlink.txt'** now press **'cat hardlink.txt'** check same data reflect in that file or not.

Step 4:- Now even if you delete the original new.txt the hardlink.txt file will be work

```

```

**\*Giving file permission to any folder or text file.**

**\*There are three users:- Owner Group Other**

**\*Each user as three types of permission Read Write and Execute.**

**\*For read 4 write 2 and execute 1**

**\* So if I have to give all permission to owner and no permission to Group and other I will use command `chmod 700`**

**\* If it is given that 571 then owner can read and execute and group have all permission and other user has only execute permission.**

```

```

**\*\*Task :- Check whether it is possible to make softlink's softlink.\*\* = Yes but if you delete original file both links will be invalid. And if you delete softlink.txt newsoftlink.txt won't work even if new.txt is still there.**

root@ip-172-31-94-70: ~/AWS

```
root@ip-172-31-94-70:~/AWS# touch new.txt
root@ip-172-31-94-70:~/AWS# vi new.txt
root@ip-172-31-94-70:~/AWS# cat new.txt
Hi
It's 1:53 in my city
just a passing shower
Beautiful weather outside.
i'm taking tea and enjoying my work.
Thank You!
root@ip-172-31-94-70:~/AWS# ln -s new.txt softlink.txt
root@ip-172-31-94-70:~/AWS# ls
